

***Travelogues* - What are they?**

Cinema productions, narrated live in your auditorium by world travelers and adventurers. Topics range from touring Australia to watching zebras in Africa and just about anything between.

Who enjoys travelogues?

Anyone who enjoys traveling, learning about new cultures and viewing exciting lands. Travelogues are family entertainment enjoyed by people of all ages. Senior citizens and families with children are proven travelogue attendees.

Who are the presenters?

Professional cinematographers who love travel and adventure. Before filming, they thoroughly research the area or topic. On location they seek out unique and interesting places for filming. Finally, they edit thousands of feet of film into the finished presentation. When the travelogue artist arrives at our auditorium, he or she sets up the projector and sound equipment prior to the show. Then LIVE from our stage, he or she narrates the travelogue for your enjoyment. The presenter also answers questions you may have about the presentation.

Note: Today's "film" is frequently high-quality digital video.
